### LEGEND

**S Sustainable** | Wine regions around the world are forging sustainable grape-growing codes that represent a commitment to using fewer agro-chemicals and fertilizers. It's a crucial first step toward organic cultivation and a focus on the health of the vines, soils, people who farm grapes year-round, and financial viability.

**O Organic** | Wines that are made from grapes that are farmed organically, using no chemical pesticides, herbicides, fertilizers, or fungicides. Many of these wines are certified organic; for estates that have chosen not to, we've verified their practices.

**B Biodynamic** | These wines are made from grapes that are farmed following highly specific practices with no use of chemical inputs, greater emphasis on soils health and spiritual, mystical, and astrological components. These selections are either certified or use a majority of the eight preparations outlined in the philosophy devised by Rudolf Steiner in the 1920s.

**V Vegan** | Wines made with absolutely no contact with animal products during their production. Wines are cloudy after fermentation and are sometimes clarified using fining agents made from harmless animal-sourced proteins like albumin, casein, gelatin, or isinglass. It's important to understand that residues of fining agents do not remain in wine, but selections with the Vegan symbol assure you that the wine was either left to clear naturally, or a plant- or earth-based product was used.

**N Natural wine** | No or almost no SO2 used.

**SK Skin-contact wine** | Whites that have gained extra colour and texture through prolonged skin contact.
